SPIN 2022
baltic plywood 14 x 8 x 3 inches

COINCIDENCE 2020
cherry and beech 24 x 7 x 3 inches

Sculpture carries my studies of proportion into three dimensions. The stepped forms progress by diminishing in size according to the ratios found in the Fibonacci Series of the Golden Ratio. These same proportions are found in shells, plants, human forms and the cosmos. They have been utilized in art and architecture for thousands of years. Various materials including wood, stone, and metal are employed in their creation, sometimes with a natural finish and sometimes painted.
